EDUCATION

B.Tech Computer Science & Engineering

Bennett University, Greater Noida, Uttar Pradesh

September 2022 - May 2026

GPA: 8.75

Senior Secondary (Class XII)

K.K. Public School, Muzaffarnagar, Uttar Pradesh

Year of Completion: 2022

Percentage: 90%

High School (Class X)

St. Thomas School, Muzaffarnagar, Uttar Pradesh

Year of Completion: 2020

Percentage: 88%

RELEVANT SKILLS

Programming Languages: Java, C++, JavaScript, SQL, HTML5, CSS3

Frameworks/Libraries: Next.js, React.js, Express.js

Tools: Git, Linux, Jupyter Notebook, Vercel, ServiceNow

Databases/Cloud: Firebase Authentication, Firebase Realtime Database, MySQL, MongoDB, PostgreSQL

Core Concepts: Data Structures & Algorithms, DBMS, RESTful API Design, Prompt Engineering

PROJECTS

Welth (AI Finance Platform)

Next.js 15, Clerk, Supabase, Prisma, Inngest, Arcjet, Gemini AI, Tailwind CSS, PostgreSQL

[Visit](#)

- Developed AI-powered finance platform for expense tracking, budget management, and real-time spending insights across devices.
- Integrated Gemini AI for transaction categorization and financial analysis, reducing manual expense tracking efforts by 80%.
- Enabled secure authentication with Clerk alongside Inngest workflows and Arcjet protection for scalable financial operations.
- Optimized database queries and dashboard rendering to improve application performance across devices.

Wanderlust (Airbnb Clone | Full-Stack Web App)

Node.js, Express.js, MongoDB, EJS, Passport.js, Cloudinary, Bootstrap

[Visit](#)

- Built full-stack web application with REST APIs, secure authentication, and CRUD operations for property listings.
- Integrated Cloudinary image optimization, reducing website load time by 40%.
- Created interactive rating system using JavaScript and AJAX, increasing user engagement by 65% with real-time data updates.
- Designed responsive UI using Bootstrap and EJS for seamless experience across devices.

Money Mate (Bill Sharing)

Gemini 2.5 Flash, Next.js 15, Tailwind CSS, JavaScript, html2canvas

[Visit](#)

- Launched scalable expense sharing application on Next.js 15 framework, processing 150+ receipt uploads with 98.8% text extraction accuracy rate.
- Used Google Gemini Vision API for automated item recognition, eliminating 95% of manual data entry tasks and reducing user input time from 5 minutes to 30 seconds per receipt.
- Implemented multi-format export (PNG/text) using html2canvas, improving response rates by 70% through cross-platform sharing capabilities.
- Made responsive user interface with real-time expense calculations and group management features, supporting multiple payment methods and instant bill splitting across team members.

ACHIEVEMENTS & AWARDS

Awards: Dean's List Award

(9.74 SGPA, 2024)

CERTIFICATIONS

Google Cloud Fundamentals: Core Infrastructure

(2025)

Algorithmic Toolbox

(2024)

Build Wireframes and Low-Fidelity Prototypes by Google

(2024)
